GHK-Cu

THE COPPER PEPTIDE
FOR REPAIR & REJUVENATION

CLEAN RESEARCH REFERENCE • EDUCATIONAL OVERVIEW • NOT MEDICAL ADVICE

WHAT IS GHK-Cu?

GHK-Cu (Glycyl-L-Histidyl-L-Lysine Copper) is a naturally occurring tripeptide that binds to copper.

It is found in human plasma, saliva and urine and plays an important role in many biological processes.

GHK-Cu has been researched for its ability to support healing, regeneration and overall cellular health.

WHY IT MATTERS

SUPPORTS TISSUE REPAIR

Promotes cell regeneration and supports the body's natural healing processes.

STIMULATES COLLAGEN & ELASTIN

Encourages collagen and elastin production for healthier, firmer skin and connective tissue.

POWERFUL ANTIOXIDANT

Helps reduce oxidative stress and supports overall cellular protection.

ANTI-INFLAMMATORY SUPPORT

May help modulate inflammation and support the body's recovery response.

PROMOTES ANGIOGENESIS

Supports the formation of new blood vessels, which is important for healing and tissue oxygenation.

HOW GHK-Cu WORKS IN THE BODY

Promotes cell turnover and regeneration

Supports collagen, elastin and connective tissue

Helps protect cells from oxidative damage

Encourages healthy blood flow and tissue repair

Supports skin health and anti-aging

Supports recovery and overall performance

WHAT IS GHK-Cu USED FOR?

- ✓ **SKIN HEALTH:** Improves skin texture, elasticity and hydration.
- ✓ **ANTI-AGING:** Supports youthful skin and reduces visible signs of aging.
- ✓ **WOUND HEALING:** Enhances healing of skin, tendons, ligaments and other tissues.
- ✓ **HAIR HEALTH:** May promote hair growth and improve hair density.
- ✓ **JOINT & TISSUE SUPPORT:** Supports repair of cartilage, tendons, ligaments and joints.
- ✓ **RECOVERY & PERFORMANCE:** Assists in faster recovery and overall tissue regeneration.

WHO MAY BENEFIT?

Athletes & fitness enthusiasts

Individuals recovering from injury

Those focused on skin health & anti-aging

People with joint, tendon or ligament concerns

Anyone looking to support overall healing & recovery

GHK-Cu is a naturally occurring peptide and is well tolerated by most individuals. It is commonly studied in both cosmetic and regenerative research.

Different protocols may vary slightly.

KEY TAKEAWAY

GHK-Cu is a powerful copper peptide that supports healing, skin rejuvenation, collagen production and overall tissue repair. Backed by science and naturally occurring in the body, it plays a key role in regeneration and anti-aging.
